Michelle K. Conklin, Deputy City Clerk

- 12 years ago my first vote on this council was to spend 30 million dollars on a new wastewater treatment plant. Of course that didn't JUST appear on the council's agenda. It took a decade of preparation and negotiation by previous councils and administrations. That preparation allowed us to be in a position to take advantage of available financing. That financing offered us significant savings which was passed through to our citizens. Since completion of the plant, we have taken steps to upgrade the rest of the system starting with our main lift station on 12th avenue. We contracted with a firm named Red Zone. Red Zone has deployed cameras throughout our entire system to analyze the condition of the pipes . That data will be cataloged and saved. This information will be an invaluable tool for long term planning . It has already been utilized for recent repairs. As we identify and index trouble areas, we are already slip lining older lines and manholes.

- We also faced a challenged with what to do with a burned out abandoned factory. This was another process that spanned two administrations and various councils. With, what I consider lightning speed, we were able to take down 30 buildings, remove the contamination, replace an abandoned street, and create a beautiful green space with an amphitheater. The green space is now full of art, music and community events. A first class hotel has been built. There is also a new Banquet facility that seats up to 600 people. Further plans in the pipeline include another hotel, public restrooms, a water feature and skate park. The old limestone building, another abandoned riverfront property, was recently been taken down. That property is currently being prepared for development. We are also making progress on the demolition of the Micro buildings. If you are an optimist, the shameful eyesore that sits on the southeast corner of first avenue and second street will be renovated before you are forced to condemn it and tear it down.

- We have become Nationally recognized for our work with the Brownsfield program and are also recognized Nationally by the APPA with multiple RP3 awards.

- In our electric department, we have instituted a preventive maintenance program for the hydro plant. This was something that previous administrations had neglected. Since the installation of the new program, the result has been a doubling of the output at the hydro plant. Another appropriate upgrade would be to name the building in honor of Glenn Kuhlemeir. We recently completed a major upgrade to our Avenue A sub station and entered into a partnership with IMEA to create a solar garden. That project is located in our Industrial park on land we could not even give away. We even have the ability to generate our own electricity, which puts our City in a unique position. As you know, the State of Texas recently experienced major outages due to ice storms. They were without adequate backup generation and their citizens spent days without power. Should we experience a major weather event and lose our primary supply, small as we are, we have the ability to keep the entire city operating with our own backup generation. We are also investing in an Advanced Metering Infrastructure. Currently, we are installing smart electric meters. Following that will be smart water meters. This will upgrade our ability to operate efficiently. The data collected from these meters will also give our residents and businesses information they can use to save on their electric and water costs.

- With regard to our water, we are currently pursuing funding options that will deliver major improvements to that system. We are also ahead of the curve with lead abatement.

EXPERT

- According to the State, the first priority for economic development is fast, reliable internet access. (code word fiber) Comcast service has become unreliable, distant and expensive. We recognized a need to develop our own fiber system. After the initial groundwork, we partnered with Surf Broadband to bring fast, reliable and quality internet service to every school, business and home in Rock Falls. The fiber roll out is ongoing. It is on track to be completed within the next year.

- These achievements only touch on what has been accomplished in the last twelve years.

- Going forward let me identify two areas that you will need to pay special attention.

First is our Police and Fire pension obligations.

We are often faced with unfunded mandates from the state. One of the most recent is the unfunded mandate regarding police reforms. After 40 years of bullying, Speaker Madigan is gone and the first piece of legislation from the new speaker's office is a politically motivated bill without any funding. Some things never change. None the less, these pension obligations are unfunded mandates on steroids. Not only does the State fail to live up to it's obligation, it mandates changes to the rules in midstream. Those most recent changes have moved us from funding levels of 90+% to 65% with the stroke of a pen. Chicago, of course gets treated differently and the only choice we are left with is to raise taxes on our citizens. Perhaps the Federal bailout will make a difference.... that was a joke

The second area is management of our storm water. We live on flat sandy ground. We have a high water table and sit on top of an aquifer. All of this makes it difficult to dispose of our storm water. Basement sump pumps, along with infiltration, play a part in flooding our wastewater system. Prior administrations failed to provide a retention pond for development of the Benchmark sub division. That has become a major problem for the people living in that area. Going forward, it is imperative to include storm water management in any future development. We have built a retention pond to service our Clearwater Industrial Park. That was done as soon as development began. You must be vigilant in dealing with future developers regarding storm water retention as we develop Glen's Garden and the Schmitt property.

Before I conclude, I would like to recognize and applaud our Department Heads for their dedication to this city. Ms Blackert, Police Chiefs Keulper, Nelson and Pilgrim, Fire Chiefs Larson and Cook, Mr Simon, Ms Hatfield, Mr Cox, Mr Padilla, Mr Spinka, Ms Jones, Mr Searing, Ms Conklin, and Mr Shaffer. Our Police and Fire fighters, and all of the rest of our employees. I would also like to thank Mr Reese for his years of sage counsel.

Finally We live in one of the greenest cities in Illinois. We have a state of the art wastewater treatment facility, a fully functioning hydro plant, and a solar garden. We are developing our riverfront and have cultivated several prairie plots. Together with the University of Illinois, we created the first Storybook Trail in Illinois. We also partnered with our citizens to prepare other trails for development. As a gigabit city, we are poised for the future. We can take pride in these achievements. We serve the public good and must always act in their best interests. They deserve the best we have to give. They take pride in their community. They volunteer for public events and support our local businesses. Unfounded claims and reckless misinformation do damage to our citizens, our employees and our city. Take your charge seriously and our community will be well served. I am proud to have played a small part in what has been accomplished here over the last twelve years. It is my hope that 12 years from now, you can also look back and cite similar achievements.

Re: Hydro Plant Transformer Replacement Site Modifications

To Whom it May Concern:

Our proposal includes the following clarifications...

1. Project includes one mobilization and demobilization (continuous construction).
2. The proposed timeframe is directly over a major holiday. We would request that this schedule adds 1 more week to give us a 3 week window to complete our work due to the holiday and in case we have bad weather during that timeframe. Proposed work schedule is 5/24 - 6/11.
3. Price is based upon drawing bid specifications. (Where any deviations are between drawings and technical spec, we based our cost assumption on what is being shown in the detailed drawings)
4. MJ assumes that there are no contaminated soils/handling needed.
5. No hot work is included. Must have the reasonable ability to work without encroaching on MAD distances.
6. Impacts of the COVID-19 cannot be reasonably determined at this time. In the event of any unforeseen delays or adverse impacts, we would expect to be given an adjustment/relief to the current scheduled substation completion date.
7. Any training required by others would be done at an additional hourly rate.
8. Any permits needed will be obtained by others or at an additional cost.
9. Any delays caused by others causing construction inefficiencies would be billed at our time and equipment rates
10. Any additional company or personal references/resumes can be delivered upon further request.
11. Time and equipment rates will be furnished upon request or at time of award.
12. Contract approval to be based on mutually agreed upon terms and conditions.

We appreciate the opportunity to submit a proposal and look forward to working with you on this project.

If you have any question or concerns, feel free to call.

Sincerely,

Rob Schuh
