Description & Reason

Route: Ave A / Dixon Ave

Contract No.: 1188Z22
Local Agency: City of Rock Falls
Project: Storm Sewer/Watermain Addition for future project on Ave A

Descriptions and Reasons: This change order is based upon the addition of 66" storm sewer and junction chamber for the future project of Ave A at the Dixon Ave intersection. The descriptions and reasons will be coordinated with the color of the change order items.

The watermain in the area was old and had leaded joints which would not have withstood the excavations or construction and would have failed causing more funds spend. Three Gate valves were added to stop the water flow for that construction. A water service was within the new area and had to be adjusted and added. HMA patches were needed for the gate valve locations and where the city was trying to find out why there was still flow after a line stop was added by the city.

A 27" storm sewer was encountered within the junction chamber and 66" storm sewer pipe area, this pipe was found to be abandoned and therefore was removed and then the remainder filled with 15 Cu Yds of flowable fill.

Martin added the bend which was included in the cost of the junction chamber. The length of the original pipe included this bend, this length was deducted from the original price. The patch area for the 66" Storm Sewer pipe on the north and south ends of Ave A was bigger based on the poor condition of the existing Ave A roadway. The 6' Manhole was replaced with a 7' manhole based upon the upgrade of a 24" pipe added instead of the existing 12" pipe. The 6' Manhole was paid for as part of the Dixon Ave project and the difference of \$6000 was paid for as part of this change order a cost savings of \$8700.

This area is within a contaminated area and had to be monitored daily and all the excavated material had to be hauled to an approved landfill.

Rock was encountered at the junction chamber location and for some of the 66" storm sewer pipe and the 24" storm sewer pipe.
