Posted: November 17, 2023

Michelle Conklin, Deputy City Clerk

The City of Rock Falls is subject to the requirements of the Americans with Disabilities Act of 1990. Individuals with Disabilities who plan to attend this meeting and who require certain accommodations in order to allow them to observe and/or participate in the meeting, or who have questions regarding the accessibility of the meeting or the facilities, are requested to contact Mark Searing, ADA Coordinator, at 1-815-622-1108 promptly to allow the City of Rock Falls to make reasonable accommodations within 48 hours of the scheduled meeting.

PROCLAMATION

Small Business Saturday

Whereas, the City of Rock Falls, Illinois, celebrates our local small businesses and the contributions they make to our local economy and community; and

Whereas, according to the U.S. Small Business Administration, there are 33.2 million small businesses in the United States: small businesses represent 99.7% of firms with paid employees, small businesses are responsible for 62.7% of net new jobs created since 1995, and small businesses employ 46.4% of the employees in the private sector in the United States; and

Whereas, 68 cents of every dollar spent at a small business in the United States stays in the local community and every dollar spent at small businesses creates an additional 48 cents in local business activity as a result of employees and local businesses purchasing local goods and services; and

Whereas, 72% of consumers reported that Small Business Saturday 2022 made them want to shop and dine at small, independently-owned retailers and restaurants all year long; and

Whereas, the City of Rock Falls, Illinois, supports our local businesses that create jobs, boost our local economy, and preserve our communities; and

Whereas, advocacy groups, as well as public and private organizations, across the country have endorsed the Saturday after Thanksgiving as Small Business Saturday.

Now, Therefore, I, Rod Kleckler, Mayor of the City of Rock Falls, do hereby proclaim, November 25, 2023, as ***SMALL BUSINESS SATURDAY*** and urge the residents of our community, and communities across the country, to support small businesses and merchants on Small Business Saturday and to Shop Small throughout the year.

Passed this 21st day of November, 2023.

Rod Kleckler, Mayor

ATTEST:

Pam Martinez, City Clerk

PROCLAMATION

Rock Falls Township High School
2023 Class 2A Volleyball Team
3rd Place

WHEREAS, the Mayor and City Council of Rock Falls, Whiteside County, Illinois are pleased to congratulate the Rock Falls Township High School Girls Volleyball for their IHSA 3rd Place in the 2A Division on November 11, 2023; and

WHEREAS, the members of the Rock Falls Township High School Volleyball Team have achieved their success through teamwork and perseverance. Volleyball teaches teamwork like few other sports can. No one player can “star” on a volleyball team, but all players must learn teamwork and selflessness which will be great traits to carry with you for life; and

WHEREAS, the team was led by Head Coach Sheila Pillars, Assistant Coach Jolene Bicket, Assistant Coach Bree Naftzger and Assistant Coach Madison McFadden. Team members are Carli Kobbeman, Kacie Witherow, Zoe Henson, Sophia Moeller, Elizabeth Lombardo, Carolyn Masini, Denali Stonitsch, Addison Miller, Kayla Hackbarth, Aubrey Vickers, Claire Bickett, Nicolette Udell, Lilly Betts, Taylor Reyna, Sophie Chavira and Ari Reyna; and

WHEREAS, Coach Sheila Pillars who in 26 seasons of coaching has racked up over 600 wins including 9 Regional and 4 Sectional Championships and has not only coached the sport of volleyball, but has given a generation of girls guidance, support and accountability to help them navigate the challenges of failure and success, develop essential skills to maximize their potential which will be of great benefit to them throughout their lives. We wish her the very best in her retirement; and

THEREFORE, BE IT RESOLVED, that I, Mayor Rodney Kleckler and the City Council of the City of Rock Falls, Whiteside County, Illinois do hereby proclaim Saturday, November 11, 2023, as “**Rock Falls Township High School Girls Volleyball Recognition Day**” in the City; and extend on behalf of the Citizens of our community, a heartfelt thank you for your hard work and dedication. Your accomplishments are recorded forever in the history of the Girls Volleyball program.

Passed this 11th day of November 2023.

Rodney Kleckler, Mayor

ATTEST:

Pamela Martinez, City Clerk

City of Rock Falls

603 W. 10th Street
Rock Falls, IL 61071-2854

AGREEMENT FOR SERVICES

This **AGREEMENT** is between City of Rock Falls IL ("Client") and Terracon Consultants, Inc. ("Consultant") for Services to be provided by Consultant for Client on the RFP for Professional Consulting Services project ("Project"), as described in Consultant's Proposal dated 10/20/2023 ("Proposal"), including but not limited to the Project Information section, unless the Project is otherwise described in Exhibit A to this Agreement (which section or Exhibit is incorporated into this Agreement).

- 1. Scope of Services.** The scope of Consultant's services is described in the Proposal, including but not limited to the Scope of Services section ("Services"), unless Services are otherwise described in Exhibit B to this Agreement (which section or exhibit is incorporated into this Agreement). Portions of the Services may be subcontracted. Consultant's Services do not include the investigation or detection of, nor do recommendations in Consultant's reports address the presence or prevention of biological pollutants (e.g., mold, fungi, bacteria, viruses, or their byproducts) or occupant safety issues, such as vulnerability to natural disasters, terrorism, or violence. If Services include purchase of software, Client will execute a separate software license agreement. Consultant's findings, opinions, and recommendations are based solely upon data and information obtained by and furnished to Consultant at the time of the Services.
- 2. Acceptance/ Termination.** Client agrees that execution of this Agreement is a material element of the consideration Consultant requires to execute the Services, and if Services are initiated by Consultant prior to execution of this Agreement as an accommodation for Client at Client's request, both parties shall consider that commencement of Services constitutes formal acceptance of all terms and conditions of this Agreement. Additional terms and conditions may be added or changed only by written amendment to this Agreement signed by both parties. In the event Client uses a purchase order or other form to administer this Agreement, the use of such form shall be for convenience purposes only and any additional or conflicting terms it contains are stricken. This Agreement shall not be assigned by either party without prior written consent of the other party. Either party may terminate this Agreement or the Services upon written notice to the other. In such case, Consultant shall be paid costs incurred and fees earned to the date of termination plus reasonable costs of closing the Project.
- 3. Change Orders.** Client may request changes to the scope of Services by altering or adding to the Services to be performed. If Client so requests, Consultant will return to Client a statement (or supplemental proposal) of the change setting forth an adjustment to the Services and fees for the requested changes. Following Client's review, Client shall provide written acceptance. If Client does not follow these procedures, but instead directs, authorizes, or permits Consultant to perform changed or additional work, the Services are changed accordingly and Consultant will be paid for this work according to the fees stated or its current fee schedule. If project conditions change materially from those observed at the site or described to Consultant at the time of proposal, Consultant is entitled to a change order equitably adjusting its Services and fee.
- 4. Compensation and Terms of Payment.** Client shall pay compensation for the Services performed at the fees stated in the Proposal, including but not limited to the Compensation section, unless fees are otherwise stated in Exhibit C to this Agreement (which section or Exhibit is incorporated into this Agreement). If not stated in either, fees will be according to Consultant's current fee schedule. Fee schedules are valid for the calendar year in which they are issued. Fees do not include sales tax. Client will pay applicable sales tax as required by law. Consultant may invoice Client at least monthly and payment is due upon receipt of invoice. Client shall notify Consultant in writing, at the address below, within 15 days of the date of the invoice if Client objects to any portion of the charges on the invoice, and shall promptly pay the undisputed portion. Client shall pay a finance fee of 1.5% per month, but not exceeding the maximum rate allowed by law, for all unpaid amounts 30 days or older. Client agrees to pay all collection-related costs that Consultant incurs, including attorney fees. Consultant may suspend Services for lack of timely payment. It is the responsibility of Client to determine whether federal, state, or local prevailing wage requirements apply and to notify Consultant if prevailing wages apply. If it is later determined that prevailing wages apply, and Consultant was not previously notified by Client, Client agrees to pay the prevailing wage from that point forward, as well as a retroactive payment adjustment to bring previously paid amounts in line with prevailing wages. Client also agrees to defend, indemnify, and hold harmless Consultant from any alleged violations made by any governmental agency regulating prevailing wage activity for failing to pay prevailing wages, including the payment of any fines or penalties.
- 5. Third Party Reliance.** This Agreement and the Services provided are for Consultant and Client's sole benefit and exclusive use with no third party beneficiaries intended. Reliance upon the Services and any work product is limited to Client, and is not intended for third parties other than those who have executed Consultant's reliance agreement, subject to the prior approval of Consultant and Client.
- 6. LIMITATION OF LIABILITY.** CLIENT AND CONSULTANT HAVE EVALUATED THE RISKS AND REWARDS ASSOCIATED WITH THIS PROJECT, INCLUDING CONSULTANT'S FEE RELATIVE TO THE RISKS ASSUMED, AND AGREE TO ALLOCATE CERTAIN OF THE ASSOCIATED RISKS. TO THE FULLEST EXTENT PERMITTED BY LAW, THE TOTAL AGGREGATE LIABILITY OF CONSULTANT (AND ITS RELATED CORPORATIONS AND EMPLOYEES) TO CLIENT AND THIRD PARTIES GRANTED RELIANCE IS LIMITED TO THE GREATER OF \$50,000 OR CONSULTANT'S FEE, FOR ANY AND ALL INJURIES, DAMAGES, CLAIMS, LOSSES, OR EXPENSES (INCLUDING ATTORNEY AND EXPERT FEES) ARISING OUT OF CONSULTANT'S SERVICES OR THIS AGREEMENT. PRIOR TO ACCEPTANCE OF THIS AGREEMENT AND UPON WRITTEN REQUEST FROM CLIENT, CONSULTANT MAY NEGOTIATE A HIGHER LIMITATION FOR ADDITIONAL CONSIDERATION IN THE FORM OF A SURCHARGE TO BE ADDED TO THE AMOUNT STATED IN THE COMPENSATION SECTION OF THE PROPOSAL. THIS LIMITATION SHALL APPLY REGARDLESS OF AVAILABLE PROFESSIONAL LIABILITY INSURANCE COVERAGE, CAUSE(S), OR THE THEORY OF LIABILITY, INCLUDING NEGLIGENCE, INDEMNITY, OR OTHER RECOVERY. THIS LIMITATION SHALL NOT APPLY TO THE EXTENT THE DAMAGE IS PAID UNDER CONSULTANT'S COMMERCIAL GENERAL LIABILITY POLICY.
- 7. Indemnity/Statute of Limitations.** Consultant and Client shall indemnify and hold harmless the other and their respective employees from and against legal liability for claims, losses, damages, and expenses to the extent such claims, losses, damages, or expenses are legally determined to be caused by their negligent acts, errors, or omissions. In the event such claims, losses, damages, or expenses are legally determined to be caused by the joint or concurrent negligence of Consultant and Client, they shall be borne by each party in proportion to its own negligence under comparative fault principles. Neither party shall have a duty to defend the other party, and no duty to defend is hereby created by this indemnity provision and such duty is explicitly waived under this Agreement. Causes of action arising out of Consultant's Services or this Agreement regardless of cause(s) or the theory of liability, including negligence, indemnity or other recovery shall be deemed to have accrued and the applicable statute of limitations shall commence to run not later than the date of Consultant's substantial completion of Services on the project.
- 8. Warranty.** Consultant will perform the Services in a manner consistent with that level of care and skill ordinarily exercised by members of the profession currently practicing under similar conditions in the same locale. EXCEPT FOR THE STANDARD OF CARE PREVIOUSLY STATED, CONSULTANT MAKES NO WARRANTIES OR GUARANTEES, EXPRESS OR IMPLIED, RELATING TO CONSULTANT'S SERVICES AND CONSULTANT DISCLAIMS ANY IMPLIED WARRANTIES OR WARRANTIES IMPOSED BY LAW, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.
- 9. Insurance.** Consultant represents that it now carries, and will continue to carry: (i) workers' compensation insurance in accordance with the laws of the states having jurisdiction over Consultant's employees who are engaged in the Services, and employer's liability insurance (\$1,000,000); (ii) commercial general liability insurance (\$2,000,000 occ / \$4,000,000 agg); (iii) automobile liability insurance (\$2,000,000 B.I. and P.D. combined single limit); (iv) umbrella liability (\$5,000,000 occ / agg); and (v) professional liability insurance (\$1,000,000 claim / agg). Certificates of insurance will be provided upon request. Client and Consultant shall waive subrogation against the other party on all general liability and property coverage.

- 10. CONSEQUENTIAL DAMAGES.** NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR LOSS OF PROFITS OR REVENUE; LOSS OF USE OR OPPORTUNITY; LOSS OF GOOD WILL; COST OF SUBSTITUTE FACILITIES, GOODS, OR SERVICES; COST OF CAPITAL; OR FOR ANY SPECIAL, CONSEQUENTIAL, INDIRECT, PUNITIVE, OR EXEMPLARY DAMAGES.
- 11. Dispute Resolution.** Client shall not be entitled to assert a Claim against Consultant based on any theory of professional negligence unless and until Client has obtained the written opinion from a registered, independent, and reputable engineer, architect, or geologist that Consultant has violated the standard of care applicable to Consultant's performance of the Services. Client shall provide this opinion to Consultant and the parties shall endeavor to resolve the dispute within 30 days, after which Client may pursue its remedies at law. This Agreement shall be governed by and construed according to Kansas law.
- 12. Subsurface Explorations.** Subsurface conditions throughout the site may vary from those depicted on logs of discrete borings, test pits, or other exploratory services. Client understands Consultant's layout of boring and test locations is approximate and that Consultant may deviate a reasonable distance from those locations. Consultant will take reasonable precautions to reduce damage to the site when performing Services; however, Client accepts that invasive services such as drilling or sampling may damage or alter the site. Site restoration is not provided unless specifically included in the Services.
- 13. Testing and Observations.** Client understands that testing and observation are discrete sampling procedures, and that such procedures indicate conditions only at the depths, locations, and times the procedures were performed. Consultant will provide test results and opinions based on tests and field observations only for the work tested. Client understands that testing and observation are not continuous or exhaustive, and are conducted to reduce - not eliminate - project risk. Client shall cause all tests and inspections of the site, materials, and Services performed by Consultant to be timely and properly scheduled in order for the Services to be performed in accordance with the plans, specifications, contract documents, and Consultant's recommendations. No claims for loss or damage or injury shall be brought against Consultant by Client or any third party unless all tests and inspections have been so performed and Consultant's recommendations have been followed. Unless otherwise stated in the Proposal, Client assumes sole responsibility for determining whether the quantity and the nature of Services ordered by Client is adequate and sufficient for Client's intended purpose. Client is responsible (even if delegated to contractor) for requesting services, and notifying and scheduling Consultant so Consultant can perform these Services. Consultant is not responsible for damages caused by Services not performed due to a failure to request or schedule Consultant's Services. Consultant shall not be responsible for the quality and completeness of Client's contractor's work or their adherence to the project documents, and Consultant's performance of testing and observation services shall not relieve Client's contractor in any way from its responsibility for defects discovered in its work, or create a warranty or guarantee. Consultant will not supervise or direct the work performed by Client's contractor or its subcontractors and is not responsible for their means and methods. The extension of unit prices with quantities to establish a total estimated cost does not guarantee a maximum cost to complete the Services. The quantities, when given, are estimates based on contract documents and schedules made available at the time of the Proposal. Since schedule, performance, production, and charges are directed and/or controlled by others, any quantity extensions must be considered as estimated and not a guarantee of maximum cost.
- 14. Sample Disposition, Affected Materials, and Indemnity.** Samples are consumed in testing or disposed of upon completion of the testing procedures (unless stated otherwise in the Services). Client shall furnish or cause to be furnished to Consultant all documents and information known or available to Client that relate to the identity, location, quantity, nature, or characteristic of any hazardous waste, toxic, radioactive, or contaminated materials ("Affected Materials") at or near the site, and shall immediately transmit new, updated, or revised information as it becomes available. Client agrees that Consultant is not responsible for the disposition of Affected Materials unless specifically provided in the Services, and that Client is responsible for directing such disposition. In no event shall Consultant be required to sign a hazardous waste manifest or take title to any Affected Materials. Client shall have the obligation to make all spill or release notifications to appropriate governmental agencies. The Client agrees that Consultant neither created nor contributed to the creation or existence of any Affected Materials conditions at the site and Consultant shall not be responsible for any claims, losses, or damages allegedly arising out of Consultant's performance of Services hereunder, or for any claims against Consultant as a generator, disposer, or arranger of Affected Materials under federal, state, or local law or ordinance.
- 15. Ownership of Documents.** Work product, such as reports, logs, data, notes, or calculations, prepared by Consultant shall remain Consultant's property. Proprietary concepts, systems, and ideas developed during performance of the Services shall remain the sole property of Consultant. Files shall be maintained in general accordance with Consultant's document retention policies and practices.
- 16. Utilities.** Unless otherwise stated in the Proposal, Client shall provide the location and/or arrange for the marking of private utilities and subterranean structures. Consultant shall take reasonable precautions to avoid damage or injury to subterranean structures or utilities. Consultant shall not be responsible for damage to subterranean structures or utilities that are not called to Consultant's attention, are not correctly marked, including by a utility locate service, or are incorrectly shown on the plans furnished to Consultant.
- 17. Site Access and Safety.** Client shall secure all necessary site related approvals, permits, licenses, and consents necessary to commence and complete the Services and will execute any necessary site access agreement. Consultant will be responsible for supervision and site safety measures for its own employees, but shall not be responsible for the supervision or health and safety precautions for any third parties, including Client's contractors, subcontractors, or other parties present at the site. In addition, Consultant retains the right to stop work without penalty at any time Consultant believes it is in the best interests of Consultant's employees or subcontractors to do so in order to reduce the risk of exposure to unsafe site conditions. Client agrees it will respond quickly to all requests for information made by Consultant related to Consultant's pre-task planning and risk assessment processes.

4 Terracon Methodology

ROCK FALLS COMMUNITY-WIDE ASSESSMENT AND CLEANUP SCOPE OF WORK

The Rock Falls RFQ calls for the following scope of work that will be completed under the USEPA Multipurpose Grant. Terracon will complete all work in a timely fashion and because Terracon is aware that EPA maintains definitive schedule requirements, Terracon will work concurrently on tasks. As an example, we will need to prepare a preliminary site inventory while conducting community outreach activities and then, based upon the community outreach input we will refine the site inventory list. During this time, we will set-up all logistics regarding reporting activities, start to develop preliminary site access and develop documents such as the project QAPP. Below is an example showing specific tasks.

Although project requirements and tasks are similar for most brownfield programs, every community has different needs and redevelopment goals that are integrated into our approach; therefore, our first step in implementing our approach is to meet with the City's staff and community leaders to develop a timeline suitable to meet your needs, your goals, and the requirements of EPA.

TASK 1—Outreach

Rock Falls intends to use a portion of the award to provide for the management, implementation, and execution of the grant funds in conjunction with community engagement activities.

Programmatic Implementation: Terracon, working with the Rock Fall's Brownfield Project Director, will develop a Community Involvement Plan (CIP), outreach materials, brownfield project website, and social media posts. Bi-annual community meetings will be scheduled either virtual or in-person to keep public informed and supplies are budgeted for printing of materials and software to manage the grant. The website and outreach materials will be created in the first 3 months of the performance period.

Community Engagement: The community will be informed of project developments through the local media, marketing materials, workshops, and the brownfield website. Rock Falls will work where applicable with long-established partners in the redevelopment area including Rock Falls Chambers of Commerce, community organizations, non-profit organizations, churches, and the Holiday Inn Hotel. Community engagement activities will include public outreach meetings, applicable fact sheets and other printed materials, outreach activity notices and posters/advertising, and meetings with citizens and stakeholders to understand the assessment process.

Activities	Deliverable(s)	Date to be completed
USEPA Required Reporting	CIP, Brownfield Website, 9 community meetings, brochures/handouts, social media posts, meeting minutes, sign in sheets and handouts	On an as needed basis throughout grant cycle

4 Terracon Methodology

TASK 2—Site Inventory

Working with residents and partners in the targeted areas, community meetings will be utilized to create a thorough site inventory including previously determined sites and additional identified sites for the assessment. Additional research will be completed using appraisal sources to identify sites qualifying for the Site Inventory List and development of the Evaluation Ranking Tool.

Activities	Deliverable(s)	Date to be completed
USEPA Required Reporting	Evaluation Ranking Tool, Site Inventory List	Meetings in 1st Quarter. Develop list and tools by 3rd Quarter through end of project.

TASK 3—Assessment

Terracon will conduct Phase I Environmental Site Assessments (ESA) and Phase II ESAs at the priority site and other eligible sites in the target area. These activities include ASTM-AAI compliant Phase Is; Generic Quality Assurance Project Plan (QAPP), Generic Health and Safety Plan (HASP) Phase II ESAs, which will include the site specific (SS)-QAPP, or a Sampling and Analyses Plan (SAP). Terracon will implement the technical aspects of the project with oversight from the Rock Falls.

Activity	Deliverable	To be completed
Assessment Activities Property Eligibility Determinations	5 Phase I ESAs 2 Phase IIs ESAs Site Access Agreements	2nd Quarter and throughout grant process
Pre-Quality Assurance Project Plan (QAPP) conference with US EPA, preparation of the draft and final (QAPP)	Draft QAPP Final QAPP	A Draft QAPP will be sent to the USEPA 45 days after Terracon is hired
Prepare Field Sampling Plans for USEPA review and approval	SAP	The SAP will be prepared on site-by-site as needed throughout grant cycle

TASK 4—Remediation/Reuse Planning

In conjunction with the activities performed during Task 3 and for projects identified for cleanup, Terracon will prepare the Analysis for Brownfield Cleanup Alternatives (ABCA) AND/OR Cleanup Plans. Cleanup planning will include evaluating cleanup alternatives, calculating cleanup costs, and determining site appropriate remediation/reuse planning to reduce health/environmental risks. Terracon will assist the Rock Falls in hosting charrettes/visioning sessions for key properties.

Activities	Deliverable	Date to completed
Plans and charrettes/visioning sessions	1 ABCA / Cleanup Plan 1 Brownfield Revitalization Plan 3 Vision Sessions/Charrettes 1 Remediation Action Plan	Beginning the 2nd quarter and continuing throughout grant cycle

4 Terracon Methodology

TASK 5—Cleanup

Terracon will manage the site cleanup activities including contractor mobilization, contaminated soil excavation, transportation and proper disposal at a permitted facility, confirmatory sampling and lab analyses, clean fill identification and placement, field observation and contractor oversight, cleanup reporting, and NFR Letter recording.

Activities	Deliverable	Date to completed
Cleanup	1 Cleanup Report 1 NFR Letter	Beginning 12 th Quarter and continuing throughout the grant cycle

TASK 6—Programmatic Support

Terracon will assist with technical portions of the Brownfield Assessment Grant to ensure compliance with EPA Cooperative Agreement Work Plan, schedule and terms and conditions. Terracon will assist the City in completing ACRES Database Reporting, Annual Financial Reporting, Quarterly Reporting, MBE/WBE Forms, and all additional Programmatic Support for the three-year term of the grant.

Activities	Deliverable	Date to completed
ACRES Reporting	Quarterly Reports	Beginning 1 st Quarter and continuing throughout the grant cycle
Annual Financial Reporting	Annual Report	On an annual basis

4 Terracon Methodology

TECHNICAL APPROACH AND METHODOLOGY

Terracon is committed to complying with USEPA requirements for this contract.

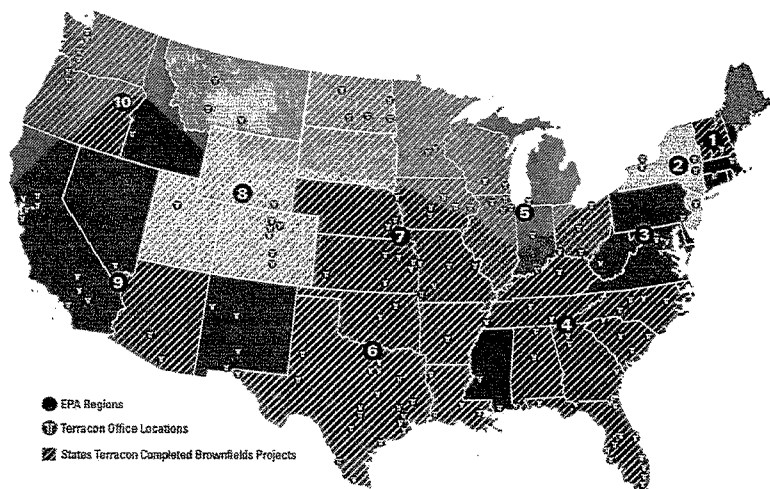

Terracon's approach to implementing a successful Brownfields Program is based upon a combination of program experience and USEPA requirements. Knowledge of the Program allows us to tailor our project approach to meet the needs of your community while integrating the requirements of USEPA funding.

Task Implementation

At Terracon, we consider ourselves an extension of our clients and their staff, and our history with Rock Falls is no exception. To that end, we have assigned Linda Yang to be the primary point-of-contact for services throughout this contract. Once we have been notified by Rock Falls of a project, Terracon will meet with Rock Falls and the stakeholders to gain a solid understanding of the goals to be accomplished. Scheduling is the key component in project implementation, driving the entire project from start to successful completion. Proper scheduling ensures each task is assigned and carried out to meet project milestones and deadlines, which is crucial for keeping a project on track. Although project requirements and tasks are similar for most brownfield programs, every community has unique needs and redevelopment goals that are integrated into our approach; therefore, our first step in implementing our approach is to meet with Rock Falls' Brownfields Program staff and community leaders to develop a timeline suitable to meet your needs, your goals, and the requirements of USEPA.

The Brownfields projects we work on benefit from our nationwide presence which enables us to share information between EPA regions and our local offices. With more than 100 experienced Brownfields professionals nationwide, we apply tailored concepts to make your Brownfields projects cost-effective. We evaluate environmental results of Brownfields sites with respect to the regulatory and financial effects on site redevelopment. These critical evaluations address the environmental challenges that can be catastrophic to the project schedule. ***No other team can provide the combination of local resources, national expertise, and knowledge of Brownfields services.*** The map represents our depth of resources and experience specific to implementing Brownfields projects with the same environmental consulting services required of your Brownfields continuing contract.

EPA maintains definitive schedule requirements such as 15% expenditures within 18 months and 45% expenditures within 36 months of grant award. By working concurrently on tasks, we routinely assist our clients in exceeding EPA requirements for their grant.

4 Terracon Methodology

TASK 1

Keeping the Community Engaged and Informed

We take pride in delivering services tailored to meet the specific needs of your community. Our team understands that Community Engagement and Outreach activities will be a collaborative effort between our project team and Center for Economic Development (CED) personnel. Terracon's Rock Falls' Brownfields Team is comfortable and talented in communicating with diverse stakeholders. With our local breadth of technical resources and broad national geography and diverse staff, translation and interpretive services can be provided internally. Terracon approaches community involvement based on our deep understanding of the people and concerns they have. To complete this task, Terracon will develop printed and web materials, participate on the Brownfield Advisory Committee, participate in public meetings as needed, and assist with the development of the interactive Brownfields Directory. Terracon routinely engages with local printers in efforts to support the local community and will look to Rock Falls' guidance on local vendors to use where possible. The Terracon team uses multiple activities to keep the community informed including the following: Community Involvement Plans

- Interactive Public Workshops and Meetings
- Visioning Charrettes
- Dedicated Brownfield Website
- Social Media
- Online Surveys
- GIS Mapping Database
- Informational Presentations
- Focus Groups
- Open Houses
- Public Dialogues
- Special School Activities
- Weekend Walks with Citizens
- Fact Sheets and Brochures
- Videos

Program Details

Will County Center for Economic Development was awarded a \$400,000 US EPA Brownfield Grant to identify and assess contaminated sites in the County.

Funds can be used for Phase I and II environmental site assessments (ESAs), cleanup planning, and community outreach activities.

Why cleanup and invest in brownfield sites?

- Increases the local tax base
- Helps spur redevelopment
- Uses existing infrastructure
- Encourages job growth
- Improves and protects the environment

Grant funding activities will focus on properties in Will County starting with areas along the waterway in identified target areas.

For more information, contact:
Will County CED
 (615) 723-1800

willcountybrownfields.com

Will County Countywide Brownfield Assessment Grant Program

CED WILL COUNTY CENTER FOR ECONOMIC DEVELOPMENT

In support of Rock Falls' Brownfields Program, the Terracon Team will work closely with you and your program staff to develop an informational pamphlet, if needed, designed to educate your community and local stakeholders on the benefits of the Brownfields Program. Shown are examples of trifold brochures recently developed for our ongoing projects.

What is a Brownfield Site?

A brownfield site is a property where actual or perceived environmental contamination complicates its expansion or redevelopment.

Sites may be contaminated with hazardous substances, petroleum, pesticides, metals and asbestos.

EPA Brownfields Program

The US Environmental Protection Agency (EPA) established the Brownfields Program to empower states, communities, and other stakeholders to promote economic redevelopment for sustainable reuse.

What does the funding cover?

- Phase I & II Environmental Site Assessments
- Clean-Up Planning
- Community Outreach Activities

A Phase I is a non-intrusive evaluation of environmental conditions at a site to determine if there is a recognized environmental condition (REC) which warrants further investigation in the form of a Phase II ESA.

Why is this important for businesses and developers?

- Environmental assessments can remove the environmental stigma surrounding a property.
- If contamination is found, rehabilitation costs can be realized and managed.
- Liability protections via federal (CERCLA & RCRA) and state laws can protect non-responsible parties.
- Redevelopment of contaminated sites can unlock private investment and leverage funds for greater redevelopment.

Identifying Sites

Do you know of a property you believe to be contaminated?

Is your property vacant because of real or perceived contamination?

Are you having trouble selling your property because of real or perceived environmental contamination?

If you answered **YES,** then the property may be eligible for the Will County Center for Economic Development Grant Program.

4 Terracon Methodology

TASK 2

Site Inventories

Terracon will work with Rock Falls and local community members to update and improve the existing brownfields site inventories to provide the team with a working basis for brownfields site selection, ranking, and management. Believing the system should match a community's technical resources, Terracon provides clients with inventory/ranking systems from simple spreadsheets to integrated scoring matrices. A brownfield property's score will change and with it its prioritization for grant funding. This requires a system that is continually and easily updated by Rock Falls staff, to remain a resource beyond the contract period.

GIS CAPABILITIES

Property Identification and Inventory

Terracon routinely consults on the development of Brownfield Site Inventories on behalf of communities to provide them a working basis for brownfield property management. A brownfield

property's score can drive the prioritization for client funds. This requires a scoring system that is continually and easily updated. Believing the scoring system should match a community's technical resources, Terracon provides clients with inventory/ranking systems from simple spreadsheets to integrated, user friendly GIS (Geographic Information System) mapping. Terracon believes the inventory system should outlast us as the consultant, without need for support beyond the grant. We will deliver thoughtful data visualization products to help communicate project data for our clients, regulators, and other project stakeholders. We utilize a GIS software platform to develop informative map products and data posting figures as static maps and web-based map deliverables. Regardless of the project scope, we strive to deliver intuitive products to help us evaluate and communicate project data.

Inventories have been an essential element on more than 90 percent of the more than 325 EPA Brownfield Cooperative Agreement projects completed by Terracon. Simple or complex, Terracon will help you develop

We will work with the Rock Falls to develop site inventory tasks that may include:

- Integration of input from community outreach meetings to develop numerical categories and weighted averages for ranking properties based on factors tailored to Rock Falls program needs.
- Research environmental data and solicit feedback from the City personnel and community members regarding local properties.
- Develop a GIS Brownfield Site Inventory as a base.
- Separate the site inventory by petroleum and hazardous materials contamination.
- Provide the City an updated Brownfield Site Inventory and Brownfield sites GIS-ready database.
- Assist in determining site eligibility in receiving an ESA via the Brownfield Assessment Grant.

Terracon is very familiar with the City of Rock Falls. We will work closely with the City to identify additional properties towards meeting the goals of your program.

4 Terracon Methodology

GIS Toolbox

Terracon developed a proprietary application used to search, query, and review project locations, project files, borings, and other Terracon resources by location that can and will be used on this assignment sharing our local experience with this team. This application is also commonly used to generate Project exhibits including USGS Site Locus maps, and aerial base map exhibits with graphic elements representing project and boring locations. Detailed site figures representing spatial data, design data, and other location-rich information should be generated using traditional GIS and CAD/Design desktop software.

Environmental Inventories Utilizing GIS

Terracon uses the most advanced and user-friendly GIS software applications and database management tools in the industry to help us effectively manage, analyze, and visualize data in support of projects nationwide. We leverage the ArcGIS platform to provide a wide range of project solutions, ranging from traditional map documents or custom web applications for field accessibility to streamlined interfaces for queries, quickly providing answers to your tailored needs. We also have staff that are versed in a variety of programming tools and languages including Python, C#, JavaScript, VB.NET, ArcGIS Server, ArcObjects, and XML to deliver customized project solutions, and execute complex database development and integration tasks. Regardless of the project scope, we strive to deliver intuitive products that help us communicate project data to our clients and other project stakeholders.

TASK 3

Environmental Assessments

Our professionals have extensive experience conducting Phase I and II Environmental Site Assessments (Phase I/II ESAs). Our local team conducts approximately 150 Phase I ESAs and 75 Phase II site assessments on an annual basis. The goal of the Phase I ESA is to identify Recognized Environmental Conditions (REC) such as hazardous substances or petroleum products on a property under conditions that indicate an existing or past release, or a material threat of a release that may impact the property. Once authorized, our Phase I ESAs will be performed in strict accordance with requirements of ASTM E1527-13/ASTM, E1527-21, and EPA's All Appropriate Inquiries Final Rule. Our findings are compiled in a final report which is reviewed and signed by an Environmental Professional as defined in Section 312.10 of 40 CFR 312.

Phase I ESA

Phase I ESA activities typically involve the collection and review of information concerning:

- Physical setting
- Regulatory records
- Historical use
- Site and adjoining property reconnaissance
- Interviews with persons/agencies familiar with the site
- Previous report review

Depending upon the age and use of the property, sampling for asbestos, lead, radon, or mold may also be recommended as part of the Phase I ESA. In addition, wetland surveys/delineations, cultural resources reviews, facility condition assessments, and Ground Penetrating Radar (GPR) can also be included. **Many of these services are offered in-house, saving the project both time and money.**

Phase II ESA

If a REC is identified in the Phase I ESA, a Phase II ESA is typically recommended. The Phase II ESA is designed to obtain additional information relative to potential contamination by collecting and analyzing samples of soil, ground or surface water, and other materials. The scope of a Phase II ESA is site specific. Components typically include one or more of the following:

- **Subsurface soil sampling and analysis**
- Groundwater monitoring well installation and sampling
- Health and Safety Plans
- Surface water and soil sampling and analysis
- Soil-vapor surveys
- Sampling and analysis of potential hazardous materials

Experience Overseeing Contractors

Terracon provides the core services required for this contract. Services such as environmental drilling, laboratory analysis, and other support functions are routinely needed. We routinely exceed **USEPA's "Fair Share Objectives/Goals"** required of federal funding on our EPA Grants by **utilizing minority, disadvantaged, and women-owned businesses**. In support of this criteria, we have selected subconsultants both to maintain this trend and with whom we have strong working relationships. A list of our subcontractors, including minority and disadvantaged firms, is provided on the Organizational chart and team section. **The Terracon Team subconsultants have worked with us on prior contracts; we know their staff and their ultimate work products.**

4 Terracon Methodology

TASK 4

Remediation/Reuse Planning

Once a Phase II ESA is completed and contaminants are found that exceed IEPA Tiered Approach to Corrective Action (TACO) remediation objectives (ROs), Terracon can prepare an Analysis of Brownfield Cleanup Alternatives (ABCA), if requested. This will evaluate options for the cleanup and regulatory closure of the site. Terracon evaluates cleanup alternatives based on the findings of the Phase II ESA, determining the best scenario to achieve regulatory closure and thereby proceed with redevelopment of the property. These alternatives will be discussed with the stakeholders for each site. ABCAs could include in-situ active remediation, risk assessments, or a No Further Remediation (NFR) letter from the IEPA with land use restrictions to safely manage impacts in-place in accordance with IEPA requirements. When appropriate, IEPA Remedial Action Plans (RAPs) can be combined with the EPA required documents to save time and money in achieving regulatory approvals. Our holistic approach, keeping big picture/redevelopment in mind, and our geotechnical capabilities enable us to consider all the factors during the planning therefore maximizing the usage of the brownfields funding.

Revitalization Plan

Every strategy is community-specific and must tie to the local markets and conditions of redevelopment. Terracon works with our clients to develop the specific format and content of the Brownfields cleanup strategy. Our focus is on the programmatic and technical aspects of Brownfield property evaluations and integrating them with the broader community vision for redevelopment.

Terracon will help you achieve coherent and targeted land planning outcomes. It is the intent of redevelopment planning to establish a conceptual vision as to how the brownfield project area might be used after necessary environmental evaluation, assessment, and possible remediation. A strategic plan incorporating the City's current planning documents, and input from community stakeholders can establish recommended land uses for the entire project area and recommend vital neighborhood, downtown and suburban connections. By integrating the concepts of sustainable development, community involvement, risk management, and collaborative project teams with Brownfields redevelopment, redevelopers and the community can avoid re-creating the Brownfields.

Cleanup Planning and ABCAs

The project will require our Team to integrate assessment findings into plans for cleanup and redevelopment by the client and the local community. In the EPA Brownfields program, two levels of planning are required to achieve Brownfields success; property-specific cleanup planning and community-wide redevelopment planning.

Cleanup planning differs greatly from technical

4 Terracon Methodology

remediation design. Cleanup planning does not involve the plans and specifications for a remediation contractor to actually bid or cleanup a property. Cleanup planning entails the feasibility and redevelopment phase necessary to set the stage for cleanup that best fits intelligent, sustainable and profitable redevelopment of Brownfields properties.

When potential costs, obstacles, or restrictions are identified for a property or group of Brownfield properties, more traditional planning can incorporate and address brownfields as a routine element in the redevelopment process.

Our Team believes that the cleanup strategy should start incorporating property-level specificity at the earliest opportunities. We will assist to finalize the ABCA.

It is important to know the difference between cleanup and re-construction capital costs when using property-specific Brownfields data in planning; experience shows us that often there can be an overlap of 10 to 40 percent that is often attributed to "cleanup", when in practice they are part of normal reconstruction to follow. Our Team understands this subtlety on Brownfields projects. When USEPA funded Nuts & Bolts of Redeveloping Brownfields and Other Contaminated Properties for Local Governments for three years at only two locations nationally, Terracon was there. As a USEPA-invited trainer, we co-presented the 3-hour interactive Effects of Brownfields Funding on the Private Developers Pro Forma training exercise.

Sustainability and Greener Cleanup

Terracon is a pioneer conducting greener cleanup in Illinois. Our Brownfields Team can demonstrate on your project how direct green and sustainable design can begin early in a project using ASTM standard.

State and Federal Reporting and Negotiating

Terracon has long established relationships with IEPA and EPA Region 5. Terracon has an in-depth knowledge of EPA Brownfield Program and IEPA's SRP program to achieve site closure. In a summary, Terracon's direct project experience, extensive brownfields track record, deep regulatory understanding, and pioneering greener cleanup will enable Rock Falls to implement the cleanup grant work smoothly and achieve site closure on budget and with an expedited schedule.

TASK 5

Cleanup

Project implementation

Terracon will collaborate with Rock Falls Brownfield Project Director to manage the proposed site cleanup activities. Our years of experience will be used to coordinate and direct contractor mobilization, contaminated soil excavation, transportation, and proper disposal at a permitted landfill facility. We will collect confirmatory samples as required by the IEPA SRP and submit those samples to a certified laboratory for analyses. Upon receipt of the laboratory reports, Terracon will review the information collected to assess the data for eligibility for clean fill identification and potential beneficial re-use in accordance with an

4 Terracon Methodology

IEPA SRP approved Remedial Action Plan and Soil Management Plan. Field observations will be documented for inclusion into a Remedial Action Completion Report for submittal to the IEPA in pursuit of obtaining a Comprehensive NFR letter, which will ultimately be record on the site property chain of title.

Anticipated project schedule

Upon being engaged to begin working on this project, Terracon will initiate eligibility and planning meetings with the City beginning in the 12th quarter of the grant cycle. Illinois and US EPA regulators will be active participants in the review and approval of the proposed remediation activities. Remediation planning and execution activities will continue throughout the term of the approved grant project setting up the future site redevelopment for success in protecting site occupants and the environment from exposure to subsurface impacts.

Task/activity lead

Terracon will use our experience obtained from similar types of remediation projects to effectively execute EPA approved Remedial Action Plans in pursuit of NFR determinations. We will manage all technical aspects of the project in direct coordination with and oversight from Rock Falls City Administrator and Brownfield Project Director, Robbin Blackert.

Outputs:

The goal of the remediation task to prepare the target site for reuse/redevelopment through assessment, remediation, and obtaining regulatory closure of identified impacts,. With an opportunity like this, we anticipate that multiple investigations and remediations will be completed during the term of the grant, which Terracon will manage and document in one Remedial Action Completion Report for submittal to the IEPA SRP for issuance of one Comprehensive NFR letter. Draft documents will be provided to the Rock Falls Brownfield Project Director for review and comment prior to submittal to the IEPA and USEPA.

TASK 6

Programmatic Support/Project Management

Terracon routinely assists with the preparation and submittal of required grant administration documents. Our approach includes distribution of regular status reports via email to your staff, USEPA, and other interested parties. Regular updates greatly streamline the development of quarterly reports. We complete required reporting forms including minority (MBE/WBE) participation, property profile forms, annual financial reporting, and all grant closeout requirements.

Our staff assists with all grant requirements including the USEPA-required Work Plan(s) development and any necessary edits during the grant period, USEPA-required annual projections to estimate the number of Phase I and II ESAs expected to be completed each year. In addition, we complete ACRES database entries, and prepare quarterly reports. We will tailor our services to meet your needs.

4 Terracon Methodology

Terracon will aid in managing the overall grant schedule including meeting USEPA-required milestones and maintaining individual project schedules and budgets for assessment and cleanup planning activities. We will also provide a budget tracking template based on your grant task budgets to assist in managing and tracking Rock Falls' grant budgets.

Terracon will tailor our invoices to reflect grant funding tasks to promote a seamless process to track the federal grant funds. At the completion of the grant, USEPA requires the closeout process to be completed within 90 days of the end of the grant period. Terracon will assist with the completion of the grant closeout summary/report including closeout forms for review and signature by Rock Falls. Per USEPA requirements, the following information will be provided:

- Financial Analysis of Grant (FS425 Form)
- Final MBE/WBE Report (5700-52 Form)
- Final Report which includes a summary of outputs/achievements of the grant funds
- Final Grant Budget
- List of all sites assessed/cleaned up using grant funds
- All activities performed using grant funds
- All assessment activities uploaded in the USEPA ACRES online database

Quality Assurance Project Plans and Terracon's Quality Process

A Generic QAPP developed in accordance with specific quality assurance/quality control (QA/QC) requirements is required by EPA's current Cooperative Agreement for Brownfields Assessments and USEPA Region 5's Brownfield QAPPs Instructions for the Preparation of Quality Assurance Project Plans. The Generic QAPP is supplemented by SS-QAPP Addendums and HASPs for the individual sites where Phase II ESAs are proposed.

Terracon has developed numerous Generic and Site-Specific QAPPs (SS-QAPP) for our clients. The Generic QAPP will serve as the Program's general QA/QC document for Phase II ESAs to be conducted and describes the process for producing analytical data of sufficient quality and quantity to accurately evaluate site conditions and meet data quality requirements in accordance with EPA standards. Terracon will ensure that subconsultants selected for assessment activities will be conducted in general accordance with IEPA requirements as well as USEPA Standard Operating Procedures (SOPs). Terracon will be responsible for development of the Generic QAPP document as well as supplemental SS-QAPP addendums and HASPs. Each document will be submitted to the USEPA Project Officer for approval prior to the initiation of sampling activities.

State and Federal Reporting and Negotiating

Terracon has long established relationships with IEPA and USEPA. Terracon has an in-depth knowledge of EPA's Brownfield Program and often works with the State Program to provide

4 Terracon Methodology

state incentives to purchasers which increase the usability and marketability of impacted properties. Our team is knowledgeable and experienced in communicating and negotiating all IEPA and USEPA requirements on behalf of our clients. Frequent and open communication with the appropriate regulatory agencies, especially during the development of a scope and strategy for project implementation, is essential to developing a schedule that will satisfy the project objectives. We will also provide your staff with draft meeting notes prior to finalizing to minimize the chance of misunderstandings and miscommunications.

As a result of years of working closely with federal and state regulators, Terracon staff has established excellent relationships at the State and is well respected throughout the regulatory community.

Terracon will assist with the preparation and submittal of required grant administration documents. Our approach includes distribution of regular status reports via email to Rock Falls staff, USEPA, and other interested parties.

Regular updates greatly streamline the development of quarterly reports. Our staff assists with the annual projection requirements by USEPA to project the number of Phase I and II ESAs expected to be completed each year. In addition, assist with and/or complete ACRES database entries, Quarterly Reports, and MBE/WBE semi-annual reports.

VALUES ADDED

Grant Writing

A sustainable brownfields program will seek additional funding required to successfully redevelop a property and/or its target area. Leveraging initiatives, such as infrastructure projects alongside development activities from both the private and public sector leads to progress and redevelopment completion. Assessment findings often lead to the need for cleanup which can be an expensive undertaking. Even though it is outside CED's RFQ, Terracon professionals are here to assist you and your grant writing needs to support expanding your brownfields program through additional grant applications.

National Account Program

Unique to Terracon, we maintain a strong network of developers and corporations through our National Accounts Management Program that we collaborate with daily. Our National Account Program provides our clients that operate in multiple states an opportunity to have focused points of contact in Terracon to assist in coordinating the completion of projects across the country with a consistent work product, fee structure, and level of service. As the needs of your community redevelopment are further defined through the brownfields process, with your approval, we will reach out to our network through this program in the interest of identifying prospects for development opportunities in your brownfields focus area.

4 Terracon Methodology

TERRACON ENVIRONMENTAL SERVICES RATE SCHEDULE 12/1/2023 – 12/31/2024

Labor Categories	Hourly Rate (\$/hr)
Principal Consultant	\$215
Program Manager	\$195
Sr. Engineer/Geologist	\$205
Project Engineer/Geologist IV	\$185
Project Engineer/Geologist III /Senior Scientist	\$175
Project Engineer/Geologist II	\$165
Project Engineer/Geologist I	\$155
Sr. Staff Geologist/Scientist II/Engineer	\$145
Sr. Staff Geologist/Scientist I	\$135
Geologist/Scientist III/Engineer II	\$125
Geologist/Scientist II/Engineer I	\$115
Geologist/Scientist I/Sr. Technician/Admin Manager II	\$105
Field Geologist/Scientist II	\$95
Field Geologist/Scientist I/Technician/Admin Manager I	\$85
Administrative Assistant	\$65

- Mileage – IRS rate
- Vehicle - \$35/usage
- PID - \$110/day
- Sampling Kit - \$5/sample
- Bailer - \$10/unit
- Groundwater Sampling Field Filter - \$35/unit
- Water Level Indicator - \$35/unit
- Survey Equipment - \$100/day
- Low Flow Equipment – \$345/day
- Soil Gas Sampling Equipment - \$350/day
- Data Logger - \$80/day
- Equipment rentals – actual cost plus handling charge
- Other supplies – actual cost plus handling charge
- Handling charge – In accordance with IEPA Part 734
